Entities within the Julius Baer Group provide advice which is not considered 'independent' within the meaning given to that term by EU Directive 2014/65/EU on markets in financial instruments (known as MiFID II).

**Suitability & sustainability** Suitability: Investments in the financial instruments and/or services mentioned may not be suitable for all recipients and may not be available in all countries. Clients of Julius Baer are kindly requested to get in touch with the local Julius Baer entity in order to be informed about the financial instruments and/or services available in their country ([www.juliusbaer.com/locations](http://www.juliusbaer.com/locations)). Risks involved in any asset class mentioned may include, but are not necessarily limited to, market risks, credit risks, political risks, and economic risks. The investor may be exposed to currency risk when the financial instrument or underlyings of the financial instrument are denominated in currencies other than that of the country in which the investor is resident. The investment, as well as its performance, would therefore be exposed to currency fluctuations and may increase or decrease in value. Investments in emerging markets are speculative and may be considerably more volatile than investments in established markets. This content may include figures relating to simulated past performance. Past performance, simulations, and performance forecasts are not reliable indicators of future results. The return may increase or decrease as a result of currency fluctuations. Shares, bank debt securities (e.g. interest-bearing bank bonds and certificates), as well as other claims against financial institutions, are subject to special regulations, such as the Bank Recovery and Resolution Directive, the Single Resolution Mechanism Regulation, and related national laws implementing such special regulations. These regulations can have a negative effect for the investor/contractual partner of the financial institution in the case of a default and the necessity of a resolution of the financial institution. **Structured products (e.g. baskets, certificates):** These are complex financial products and therefore involve a higher degree of risk. They are intended for investors who understand and are capable of assuming all risks involved. Structured products may therefore only be sold to experienced investors and require additional advice regarding product-specific risks. The value of the products is not only dependent on the development of the underlying but also on the creditworthiness of the issuer, which may vary over the term of the product. In the case of the issuer's insolvency or bankruptcy, the investors may lose their entire investment in the product.

**Conflicts of interest** In order to prevent conflicts of interest from adversely affecting the interests of its clients, Julius Baer has established a policy and procedures which are designed to identify and manage such conflicts. These include organisational and administrative arrangements to safeguard the interests of clients. Julius Baer's arrangements include adequate remuneration policies (for persons involved in the production of this content) based largely on qualitative criteria (e.g. the overall quality and accuracy of research) and only remotely on quantitative elements (e.g. the overall performance of Julius Baer). A Julius Baer entity may, to the extent permitted by law, participate or invest in other financing transactions with the issuer of the securities referred to herein, perform services for or solicit business from such issuers, have a position or effect transactions in the securities or options thereof, have any other significant financial interest regarding the issuers of the securities referred to herein, and/or may have done so in the past. For further information about our interest in the investments featured, see the section 'Disclosure & recommendation history' above.
